

Assignment 3

Objective: The goal of this assignment is to understand the whole structure of Neural Networks and implement one from scratch

Problem Statement: read the [Blog](#) provided and implement a neural network from scratch. You can use the code provided also in the Blog.

Submission Requirements:

- Submit a Python notebook (.ipynb) containing the code and the output.
- Include comments explaining each part of your code.
- Provide a short report summarizing your understanding of the blog inside your **notebook** (use Markdown).
